You Are Helping Create Love, Light, and KHUSHII

Dear Supporters,

Thank you for being the light in the lives of more than 50,000 underserved children this festive season and beyond.

With your generosity we now carry the lamp of education across 12 states in India attempting to fill all dark corners with the light of education. Please accept our heartfelt gratitude for your patronage that is empowering our children.

Here is a fresh update on the action from the ground that your kind support has made possible. I sincerely hope that you will see a glimpse of our sincere efforts through this newsletter.

Yours sincerely,

Harish Gosain
Executive Director, KHUSHII

SMART CLASSROOMS

Quality education is critical in today's world and smart classes are precisely aiding us to achieve that. Smart classes are modern methods that use technology to provide students with quality education for improved learning outcomes. It is necessary to keep up with the fast-paced environment and rising competition. In recent years, educational standards, technological advancements, and inventions have surged. Schools have begun to adapt latest teaching methods, such as interactive whiteboards and projectors. Teachers are now able to use videos, images, documentaries, and other media to prepare study materials for their students.

Through KHUSHII's Smart classes teachers have been able to gain access to tools that are helping them have more effective learning and teaching experiences. Smart classes are helping increase students involvement and interest. There are today increased opportunities to learn and practise, as well as better availability of resources for improved learning outcomes.

Smart Classes are aiding the development of stronger student and teacher relationship by fostering an interactive environment. Students are now more eager to learn and ask questions about the concepts.

SMART CLASSROOMS FOR 2,494 STUDENTS

We are delighted to share that with support from EXL Service we have set up Smart Classrooms to help students studying in Sector 12 and Sector 63, Noida

Smart classrooms are helping the classroom experience, student interactions with teacher and among themselves. Students are getting to understand the concepts in a much better way now.

A total of 2,494 students are being benefitted by EXL supported classrooms

INFRASTRUCTURE SUPPORT FOR SCHOOL

Riello provided infrastructure support to a government school situated in sector 6, Gurugram towards helping the students get better education facilities.

Infrastructure support can play a very important role in imparting education since students and educators need safe and functional classrooms, clean drinking water, separate toilets for girls and boys so that health and hygiene can be maintained

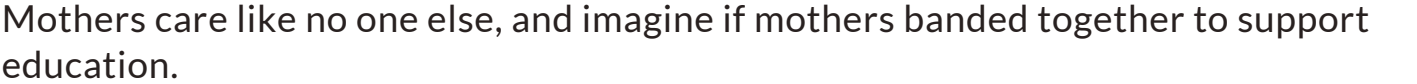

STUDENTS CONDUCT A CLEAN UP DRIVE

Students from Municipal School Jogeshwari, Mumbai conducted a clean-up drive to support the national mission - Swachh Bharat and our environment.

Schools play a very important role in making our young children aware about the important issues and social causes and we are glad to share that children from all across KHUSHII supported schools regularly conduct awareness and action drives such as the one mentioned here throughout the year.

Mothers' active participation contributes to the community's inclusive development while also assisting us in creating a sustainable environment. Mother's Group activities and active participation contribute to social change, improved access to education and awareness about health and hygiene, and basic human rights.

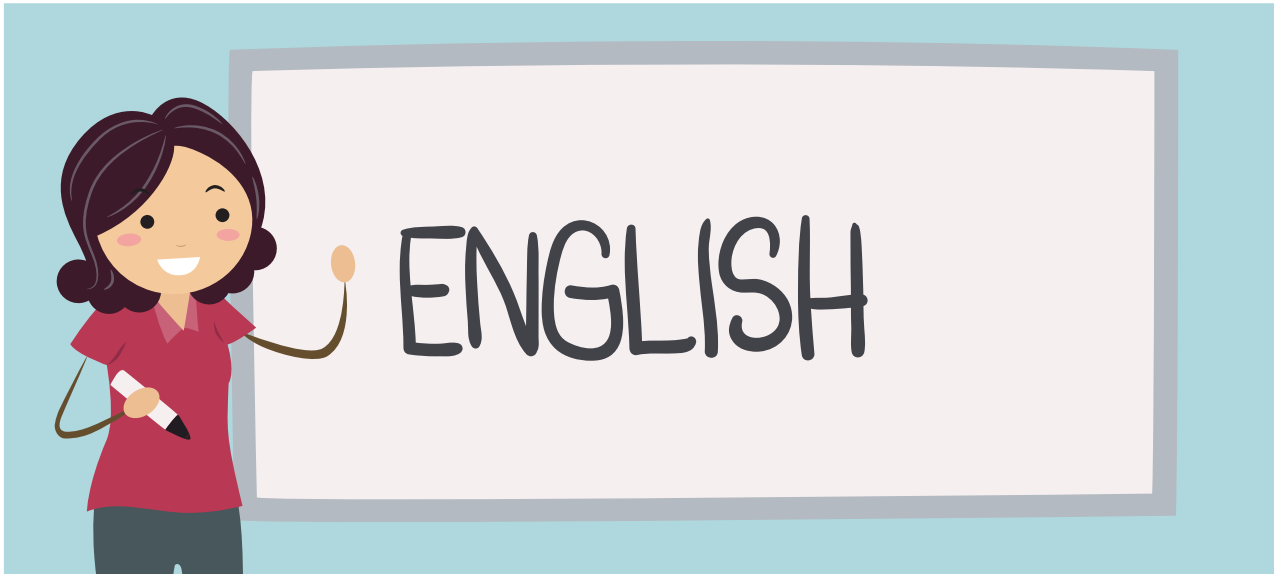

5 Mothers Groups have been formed, one in each of the KHUSHII centres in Bengaluru and Hyderabad. These Mothers Groups act as the organisations ambassadors propagating the importance of education within their communities.

We have been able to achieve greater success with the Mothers Groups who are passionately creating awareness and engagement and helping the light of education reach all dark corners

MOTHERS ARE HELPING US BRING BACK CHILDREN TO SCHOOL

I AM KHUSHII

KHUSHII isn't simply an association yet is a demonstrated word and a steady learning stage in my life.

I, Shaloo Sudhir (a postgraduate in English and Trade) feel lucky to be a part of this association. My relationship with KHUSHII began as a worker Teacher (Spoken English in GGSSS NIT-3 School, Faridabad) in 2018. These four years have been a time of learning and serving, and I can see myself developing with this establishment expertly as well as by and by.

Preparing for instructors/teachers is a normal undertaking in this association which unequivocally puts stock in staff strengthening and development. Be it, online classes, during troublesome seasons of Coronavirus, granting quality schooling, getting ready powerful illustration plans, creating supportive review materials, or turning out to be more insightful. The different advising and stress management meetings help us to relate with understudies at the ground level, understanding and settling their concerns as required. It's wonderful to see them filling in various fields- communicating in English, day camp exercises, fundamental upsides of life, individual cleanliness, and so on.

During this excursion, I have gotten a ton of help from the association and my seniors during my tough times while confronting a well-being challenge as the organization remained by me, and reinforced my self-control to battle and return quickly to playing out my obligations with everyone of my energies.

I'm grateful for being a part of such a perfect establishment. Let KHUSHII Thrive everywhere.

Shaloo Sudhir
