Timeless Footprints of Life

CAPTURED BY KHUSHII

Timeless Footprints of Life (TFL) - 'Indians for India'. This unique connection, across oceans, is an invisible blanket of familiarity that warms our hearts. One that invokes the fragrance of our Motherland – India.

The Indian Diaspora in the US were the brave ones who left the homelands behind, to slowly and gradually dream bigger dreams and make their nation proud, creating memorable footprints on the Indian map. Today these names, when spoken of, are a reminder of your achievements and it is this which makes the story worthy of being documented, and shared with our beneficiaries to inspire them to dream bigger dreams.

To celebrate this unique connection between the personalities and their country India, we, with great pride invite them to speak of their story and allow us to capture special moments of their journey across the seven seas, and etch a moment in time for eternity.

We invite the personalities to be one of the chosen 100 participants, whose name and weightage in the book will carry meaning, when distributed globally, and they can be celebrated not only for their successes but also for their philanthropic nature.

This beautiful book will be penned by Aman Nath, eminent author, art historian, and owner of the heritage Neemrana properties across India.

Come forward USA to archive your journey, and build futures in India.
